

LinkEye

Agents of Network Assurance

RELIABLE. SCALABLE. INTELLIGENT.

Comprehensive
Insights

Actionable
Intelligence

Assured
Performance

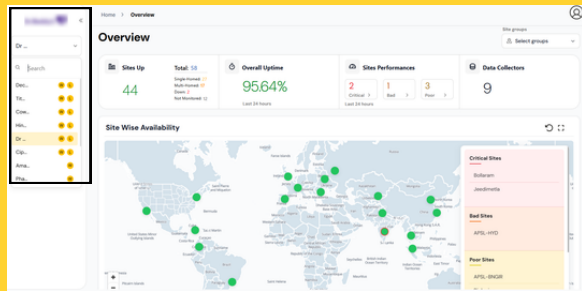

BOOK A DEMO

www.linkeye.ai

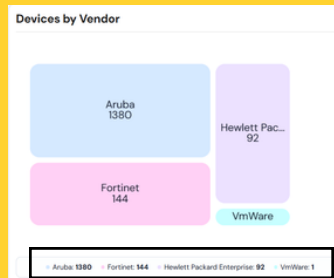

UNIFIED VISIBILITY & CONTEXT

A contextual view of every network environment you manage across customers, vendors, and sites. Instantly understand network health, device composition, and site behavior.

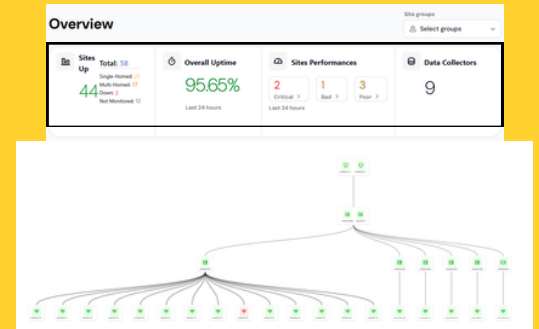

Multi-Tenancy

Consolidated view of all site status and environments

Multi-Vendor Insights

Comprehensive visibility into device distribution and performance

Site-Level Insights

Real-time visibility into site performance and network topology

AGENTIC AI NETOPS

Transform network operations with agentic AI that correlates multi-vendor telemetry to identify root causes, recommend plan of actions, and highlight compliance risks to help reduce MTTR and streamline NOC workflows.

AI-Assisted Root Cause Analysis

TOTAL ENTRIES 163

EOS-EOL Agent

Consolidated view of risk levels and compliance status of all devices

Total Vulnerabilities: 4

SI No	CVE ID	Severity	Description
1	CVE-2025-24477	Medium	FG-IR-25-026 Heap-based buffer overflow in cw_std daemon
2	CVE-2024-52965	Medium	FG-IR-24-531 PKI via API: Authentication granted with an invalid certificate
3	CVE-2025-22254	Medium	FG-IR-25-006 Privilege escalation in GUI websocket module
4	CVE-2025-24471	Medium	FG-IR-24-544 asp-cert-auth bypass via revoked certificate

Vulnerability Insights

TOTAL ENTRIES 1637

DEVICE NAME	LOCATION	VENDOR MODEL	FIRMWARE VERSION	No of Vulnerability	Vulnerabilities
INCENTIS_FWD		Fortigate 40F	v18.10a04043134707 (5A1)	4	12

Vulnerabilities Agent

Map of live device inventory to known vulnerabilities

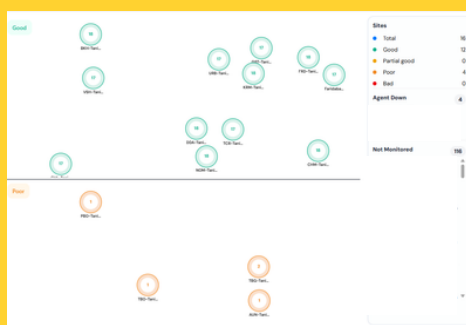

RCA Agent

Correlate multi-vendor telemetry and surface diagnostic insights

DIGITAL EXPERIENCE

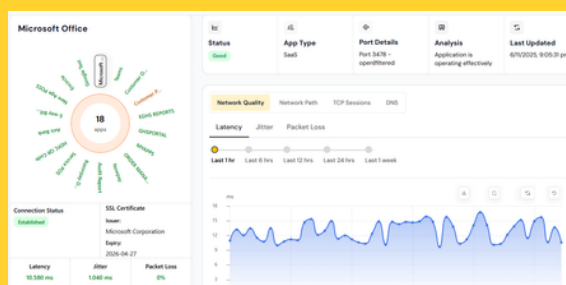

Experience your network through the eyes of its users!

Combines real-time metrics and synthetic path testing to reveal how applications perform across every site, connection, and service.

Site Experience Overview

Comprehensive view of user-experience quality

Application Health Summary

Measure latency, jitter, and throughput to assess network behavior

Tracepath Analysis

Test application paths to determine the source of latency or loss

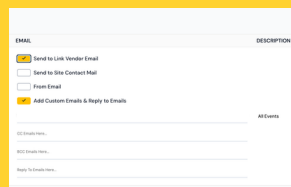

SERVICE ASSURANCE & ACCOUNTABILITY

Service provider accountability and compliance with end-to-end service visibility.
Tracking SLA adherence, vendor performance, and escalation workflows in real-time.

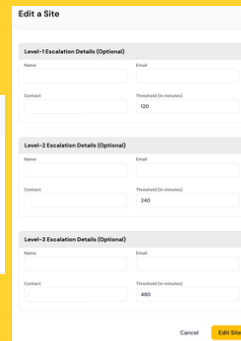

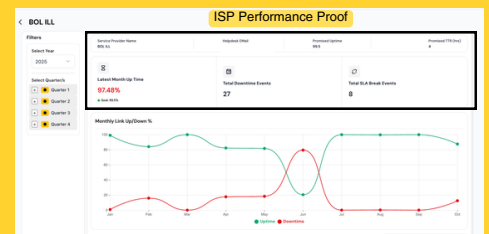

Customer Self-Service Portal

Visibility into Infrastructure and Service
Provider performance

Escalation Management

Managing multi-level escalation timelines
and tracking with SLA context

Provider Performance Proof

Monthly link performance and
compliance tracking

PROOF OF SCALE

Built for scale, proven in production

01

< 35 seconds

Auto-troubleshooting of WAN anomalies across
1,000+ sites

02

1,000+ Mission-Critical sites

Always-on connectivity through faster RCA and
fault isolation

03

1,000+ Hotels | 120K APs | 4K Links

Wi-Fi and WAN Co-Pilots powering global hospitality
networks

04

100% visibility

Digital Experience Monitoring for quick-commerce
and warehousing apps

THE LINKEYE ADVANTAGE

Comprehensive Asset Intelligence

- Centralized configuration and change tracking for all devices
- End-to-end asset visibility across WAN, LAN, and sites
- Comprehensive network performance insights through ready and configurable reports

Vendor Agnostic Integration

- Unified network management with no vendor lock-in
- Integrate with over 100+ OEMs using SNMP, API, and streaming telemetry

SOC - 2 Certified Security

- Regulatory compliance and data security
- Protect sensitive data with strict access control and encryption

Data Driven Decisions

Make critical, data- backed decisions swiftly and confidently to stay ahead of the competition

Guaranteed SLA Adherence

Ensure consistent SLA adherence with continuous monitoring

Reduced Downtime & Network Cost

Prevent downtime and slash operational costs with automated troubleshooting and analysis
